PROFESSIONAL SUMMARY

QA ENGINEER | MANUAL TESTING | JAVA | SELENIUM | API TESTING | AGILE | TEST AUTOMATION

QA Engineer with experience in manual testing, API validation, and Selenium automation, combined with strong expertise in data validation within the insurance domain. Skilled in identifying defects across policy and commission workflows, improving validation efficiency through Python-based automation, and ensuring data accuracy in large-scale systems. Hands-on experience with STLC, Agile environments, REST API testing, and automation frameworks, with a focus on reducing manual effort and improving test coverage.

SKILLS

Programming & Scripting – Core Java, SQL, Python (Basic Scripting)

Testing Skills – Manual Testing, Automation Testing, Test Case Design, Defect Tracking, STLC & SDLC

Automation Testing – Selenium WebDriver (Java), TestNG

API Testing – Postman, Status Code Validation, Response Verification

Reporting & BI Tools – SAP BusinessObjects (SAP BO), Excel (Pivot Tables, Lookup Functions, Data Validation, Data Cleaning)

Tools & Platforms – Fireflink, Postman, Life Asia, VS Code, Eclipse, Jupyter Notebook, Maven

Methodologies – Agile Methodology, Test Documentation, Test Scenario Design

DevOps & Version Control – Git, GitHub, Jenkins

Soft Skills – Analytical thinking, Problem solving, Attention to detail, Team collaboration, Time management, Adaptability

EXPERIENCE

Data Analyst

ICICI Prudential Life Insurance (via Eureka Outsourcing Solutions)

Mar. 2025—Sep. 2025 • Mumbai, India

- Validated policy and commission data across reissuance workflows, ensuring accuracy in system-generated outputs.
- Identified discrepancies in policy records using Life Asia, improving data reliability across operations.
- Generated validation reports using SAP BusinessObjects to support defect tracking and resolution.
- Automated validation checks using Python and Excel, reducing manual effort by ~60–70%.
- Collaborated with cross-functional teams to investigate defects and improve system processing accuracy.

Software Testing Intern

Robowaves Software Solution Pvt. Ltd.

July. 2024—Feb. 2025 • Pune, India

- Designed and executed manual test cases for web applications, ensuring functional accuracy across modules.
- Reported and tracked defects with clear reproduction steps, improving issue resolution efficiency.
- Performed API testing using Postman to validate response data, status codes, and service behavior.
- Developed Selenium WebDriver scripts (Java) for regression testing of critical workflows.
- Participated in crowd beta testing, identifying usability and performance issues

PROJECTS

Commission Validation Automation

Insurance Domain

Role: Data Analyst **Tech:** Python, SQL, SAP BusinessObjects (SAP BO), Advanced Excel, VB Scripting.

Summary: Developed Python-based validation scripts to automate commission verification across 8-10 policy attributes, ensuring compliance with internal commission rules aligned with IRDAI guidelines.

- Developed Python-based validation scripts to audit commission deductions across 8-10 attributes in life insurance policies.
- Reduced manual validation effort by ~70% by replacing Excel/VBA-based processes.
- Extracted and analyzed policy datasets using SAP BO and Life Asia to support reconciliation and reporting workflows.
- Ensured compliance with IRDAI-based commission rules through structured validation logic.
- Identified inconsistencies in policy and commission data through automated checks.

ShopperStack Web Application Testing

Software Testing

Role: Software Tester **Tech:** Java, Selenium WebDriver, Fireflink, Manual Testing, Postman, MS Excel.

Summary: Perform functional and automation testing of the ShopperStack web application to validate user workflows and ensure system behavior matched expected requirements.

- Designed detailed test cases and test scenarios for critical application modules including user registration, login, product browsing, and order processing.
- Executed functional and regression testing to verify system behavior across multiple user workflows.
- Implemented Selenium WebDriver automation scripts using Java to automate repetitive test scenarios.
- Managed test execution and coverage using Fireflink script-less automation testing.
- Performed API testing using Postman to verify endpoint responses and data consistency across services.

EDUCATION & CERTIFICATIONS

Bachelor of Technology (BTech) – Computer Science and Engineering

DBATU University – Fabtech Technical Campus, College of Engineering and Research • CGPA – 7.98 • 2024

Certifications – Introduction to Data Science, Python 101 for Data Science, Java Full Stack, Java Basics
